For nearly four decades, public- and private-sector clients worldwide have selected Hill International (NYSE:HIL) as construction consultants on their most complex projects. Each of our clients has unique needs and goals, yet they choose Hill because they need experts who can prevent problems, minimize risks and eliminate surprises – they need a firm they can trust who will deliver results. Meeting our clients’ diverse needs in managing construction risk and exceeding their highest expectations is our goal at Hill. We accomplish this objective by providing a broad range of project management, construction claims and consulting services that support our clients during every phase of a project, from concept through completion. With 4,200 employees in 100 offices worldwide, Hill has the experience and the expertise to help our clients deliver their projects on time, within budget and with the highest quality possible.

Cover photo: Etihad Towers, Abu Dhabi, UAE. The $681 million Etihad Towers is a world-class, mixed-use development located on the prestigious Khalidya coastline in Abu Dhabi. The development comprises five towers ranging from 49 to 76 stories above a five-level podium with a built-up area of 519,000 square meters (5.5 million square feet). Hill was recognized with multiple project management awards for our role in helping to deliver this iconic development for H.H. Sheik Suroor Bin Mohammed Al Nahyan.

Inset photo: The Pearl Qatar, Doha, Qatar. The Pearl Qatar is a residential master-planned development built on an artificial island spanning nearly four million square meters (988 acres). Once fully completed in 2015, it will feature an expected 15,000 dwellings and 45,000 residents. Hill is managing the construction of several projects on the island including the Viva Bahriya Towers and the Porto Arabia Towers on behalf of The Land Investment & Real Estate Development Company.
To Our Fellow Stockholders:

We are pleased to announce that after five years of a very challenging global economic environment, 2013 was an extremely positive year for Hill International. Our company saw a return to double-digit growth which resulted in our total revenue, consulting fees, EBITDA and operating profit climbing to all-time highs. Our successful business development efforts also drove our total backlog to a record $1.027 billion, the first time ever that our company has exceeded one billion dollars in backlog. Finally, and most importantly, we returned to profitability after two years of net losses.

And so far in 2014, we continue to be successful in attracting new clients and winning new projects throughout the world, where our global presence, depth of experience and outstanding professionals have created one of the very best professional services firms in the global construction industry.

Hill International’s mission is to be the very best professional services firm in the world helping our clients minimize the risks inherent in the construction process.
2013 Financial Results

Hill’s total revenue was up 20% to a record $576.7 million last year, and our consulting fee revenue increased 23% over the prior year to a record $512.1 million. This was our strongest growth since before the beginning of the global recession, during which we averaged just 6% growth in consulting fees (although this was much better than many of our competitors).

Our recent growth was recognized once again by The Zweig Letter, which ranked Hill on its “Hot Firms 2013” list as the 77th fastest-growing firm in the construction industry in the U.S. and Canada over the prior four years. We have now made that distinguished list a remarkable 11 times in the past 12 years.

In addition to our success in growing the top line, we continued last year to aggressively manage our overhead costs. As a result, our SG&A margin last year dropped to 35.8%, much improved from 41.4% in 2012 and 43.9% in 2011. In fact, it was the lowest it has been since we became a public company eight years ago.

This focus on minimizing our overhead costs together with leveraging our strong growth in consulting fees led to Hill achieving record EBITDA of $41.3 million last year, up 161% from the prior year. Operating profit for 2013 was also a record, at $32.5 million, up 519% from 2012. As a result of this dramatic improvement, we were able to return to profitability last year, with net earnings of $1.6 million, or $0.04 per diluted share.

Our net earnings continue to be adversely impacted by our high interest expense (which totaled $22.9 million last year). We are working hard to lower both our total debt as well as the cost of that debt so that in the future more of our EBITDA and operating profit can drop to the bottom line for the benefit of our stockholders.

Looking at our two operating segments separately, Hill’s Project Management Group delivered an outstanding performance last year. Total revenue was a record $452.5 million, an increase of 22%, and consulting fees were a record $392.6 million, up 26% from the prior year. Operating profit for the Projects Group was also a record in 2013 at $48.7 million, up 109% from 2012. The group’s operating margin was 12.4% for the year, a big improvement from 7.5% in 2012.

Hill’s Construction Claims Group had a solid performance in 2013 as well. Total revenue was up 14% to a record $124.2 million and consulting fees were up 13% to a record $119.5 million. Operating profit for the Claims Group last year was a record $12.2 million, an increase of 51% from the prior year. And the group’s operating margin was 10.2% for the year, up nicely from 7.7% a year earlier.

All of those “records” may make us sound like a broken record, but it was just a terrific year for both of our operating groups.

Acquisitions

We operate in two sectors that are highly fragmented with many smaller, regional competitors. We believe that through a strategy of acquiring and integrating the best of these firms, we can accelerate our growth and continue to improve our competitive position. In 2013, we acquired two such firms.

In May, we acquired Binnington Copeland & Associates Ltd. (BCA), a firm that provides commercial and contractual consulting and training services to the construction industry. Headquartered in Johannesburg, BCA then had 25 professionals involved in some of the largest power, mining and commercial projects in South Africa. The company has grown since we acquired it and we have since won several significant assignments that have already made this an outstanding acquisition for Hill’s Construction Claims Group.

In December, we acquired Collaborative Partners, Inc. (CPI), a firm that provides project management services on healthcare, life sciences, educational, commercial and residential construction projects throughout New England. The acquisition of CPI, which then had 20 professionals based in Boston, has allowed Hill’s Project Management Group to significantly expand its operations and resources in New England.

Both BCA and CPI were structured as all-stock transactions since we wanted to avoid any adverse impact to our balance sheet. Even though we paid for these two companies with what we believe were undervalued shares of Hill stock, we think the value-added that these two companies bring to us will more than make up for the relatively small amount of stockholder dilution involved.

We have high expectations for our new operations in South Africa and New England and we are certain our new colleagues from BCA and CPI will help us deliver on those expectations.
Focus on New Business Development

In 2013 we had the most successful year in the history of our company with regard to our business development efforts, with net bookings of more than $600 million. Last year, Hill was awarded work on some of the largest and most complex construction projects and programs in the world.

These include construction of the new Riyadh Metro system in Saudi Arabia, the new Trump Towers Rio commercial development in Brazil, the new National Museum of Qatar in Doha, the Mitikah development in Mexico City, and assisting New Jersey Transit with its recovery efforts following Superstorm Sandy. Hill is also helping to manage three of the largest aviation expansion programs in the United States: at Los Angeles, Phoenix Sky Harbor and Salt Lake City International Airports. These and some of the other exciting new projects we won last year are profiled on subsequent pages of this Annual Report.

As a result of this success, we remain very optimistic about our financial performance going forward. We will continue, as always, to make new business development one of our company’s highest priorities.

Leadership Transition

Early in 2014, our Board of Directors approved a leadership succession plan that will allow for the transition of our Chief Executive Officer position at the end of 2014. Effective December 31, 2014, Irv Richter will relinquish the CEO title but will remain with the company as Chairman. At the same time, David Richter, currently our President and Chief Operating Officer, will become President and CEO.

We expect a smooth transition as David has been President of Hill for 10 years and has been in an executive role with the company for 19 years. We have worked together very well during that time and expect that we will continue to do so going forward. The strategy that is in place at the company—the one that has made Hill one of the best firms in the global construction industry—is working and the company has been, and continues to be, successful. So while we are sure that there will be changes at Hill next year, we believe that our company is on the right path and will remain on that path under David’s leadership.

2014 and Beyond

Since the beginning of the new millennium, Hill International has been one of the most successful firms in the global construction industry. From 2000 through 2013, we grew our annual consulting fees from less than $30 million to more than $510 million—seventeen-fold growth. We have grown our employee base from 300 professionals mostly in the U.S. to 4,200 professionals in 100 offices in 35 countries around the globe. We have won over 80 awards for excellence in managing our clients’ construction projects (16 of them last year alone!). And we took Hill from a small, private, family-owned firm to a global public company listed on the New York Stock Exchange.

The past five years have been challenging ones for our industry and for our company, but we believe that 2013 was the year that we turned the corner. While the price of our common stock rose last year by 7.9%, its performance trailed well behind the broader markets (the S&P 500 Index was up 32.4% and the Russell 2000 Index was up 27.7% last year). Although most of Wall Street has yet to catch on to what a great company we have built, we remain confident that Hill is on the right track. If we continue to perform successfully for our clients and continue to manage our business well, we know that our top and bottom lines will continue to improve substantially and our common stock will be priced accordingly.

We and the rest of our management team remain focused on the right issues: maximizing our revenue growth, minimizing our overhead costs, deleveraging our balance sheet, and continuing to exceed our clients’ expectations in every way possible.

We thank you for your investment in our company and your trust and confidence in our board of directors, our management team and our outstanding professionals around the world. We will continue to work hard in 2014 and beyond to reward that investment and to ensure that Hill International excels in its mission: to be the very best professional services firm in the world helping our clients minimize the risks inherent in the construction process.

Irvin E. Richter
Chairman and
Chief Executive Officer

President and
Chief Operating Officer
Since becoming a public company in 2006, Hill has delivered strong revenue and backlog growth. As we grow globally, we are faced with certain financial risks, uncertainties and challenges. In 2013, we were able to emerge from a very challenging global economic environment with record backlog, revenues, EBITDA and operating profit. We are proud of our accomplishments in overcoming both business and financial challenges and are looking forward to an even more successful 2014 and beyond. The following are some highlights of Hill’s financial performance in 2013 and over the past five years.

</table>
Tappan Zee Hudson River Crossing, Tarrytown, NY

Hill is providing project labor agreement (PLA) administration and labor management services for the New York State Thruway Authority during construction of this $3.9-billion twin-span bridge which will replace the existing Tappan Zee Bridge and carry Interstates 87 and 287 across the Hudson River.
Construction is one of the world’s most difficult and challenging endeavors, and big projects carry big risks. Even one mistake in any of the thousands of different tasks on a project can mean big problems and result in serious schedule delays and cost overruns. With the financial stakes so high, it is critical that every step of the project be managed carefully. Hill International is one of the premier firms in the world helping our clients manage their projects and programs more effectively, so that they are finished on time, within budget and with as few claims as possible.

Whether the project is a high-speed rail line or a high-rise office building, we provide our clients with a full-spectrum of services, including program management, project management, construction management, project management oversight, troubled project turnaround, staff augmentation, project labor agreement consulting, commissioning, labor compliance management, and estimating and cost management services.

Having participated in over 10,000 project assignments with a total construction value of over $500 billion, Hill has managed all phases of the construction process, from concept through completion. Engineering News-Record magazine recently ranked Hill as the 9th largest construction management firm and the 10th largest program management firm in the United States.

We are currently managing some of the largest and most complex projects and programs in the world, including construction of the new Midfield Terminal Complex at Abu Dhabi International Airport, the renovation of the United Nations Office Complex in Geneva, construction of the Doha Metro Green Line in Qatar, and extension of the Metro Gold Line in Southern California. Our portfolio of successful projects becomes larger and more impressive each year, as you can see from the projects on the following pages that Hill was selected to manage in 2013.
Riyadh Metro Lines 4, 5 & 6, Riyadh, Saudi Arabia

The Hill team is overseeing design and construction deliverables through the project life cycle for Package 3 of this $22.7-billion program, which consists of three of six lines (4, 5 & 6) of the new Riyadh Metro system. This phase of the program will cover 67 kilometers of track with 48 kilometers of elevated alignment, 5.5 kilometers of mined tunnel, 22 stations and nearly 13 kilometers of bored tunnel constructed through some of the most congested districts in Riyadh.

“Construction of running tunnels and station structures for the No. 7 Subway Line Extension project was substantially completed approximately five months ahead of schedule. Completion was achieved under budget...adhering to complete technical specifications. MTA takes this opportunity to thank all involved in this project, including the PM/CM team.”

Paul Matthews, P.E.
Construction Manager
MTA Capital Construction Company
New York, NY

“The services were performed in a very professional manner and we were extremely pleased with Hill’s management of this project.”

Kevin R. Kline, P.E.
District Executive
Engineering District 2-0
Pennsylvania Department of Transportation
Clearfield, PA
Hill has effectively managed every situation by maximizing the interests of the owner and the experience of the contractor. They do this by staying current on best practices in the construction industry and maintaining constant high level communications with the owner. The Hill team's proactive and competent approach has resulted in outstanding working relationships at all project levels. They delivered...ahead of schedule and significantly under budget. This accomplishment is all the more impressive when considering that 90% of all public works finish over budget by an average of 20%.

Christopher L. Rodgers
Executive Director
Erie International Airport
Erie, PA
Suquamish Clearwater Casino Resort, Seattle, WA
Hill is providing construction management services in connection with the expansion of the Suquamish Clearwater Casino Resort which when complete, will be the largest convention center in the West Sound region of Seattle.

Los Angeles International Airport, Los Angeles, CA
Los Angeles World Airports (LAWA), a department of the City of Los Angeles, is currently in the midst of a multi-billion-dollar capital improvement program at Los Angeles International Airport (LAX). Hill is providing project controls support services for the program.

Government of Basra 2040 Master Plan, Basra, Iraq
Basra’s 2040 Master Plan and associated infrastructure projects are introducing sustainability principles that are the first of their kind in Iraq. Hill is providing construction consulting services to assist with the management of Basra’s capital projects.

“Without hesitation, I highly recommend Hill International to any owner that has the need for an experienced and successful project and construction management firm. The Hill team has successfully demonstrated how it uses superb leadership, passion, commitment, knowledge and technical competency to be the…owner advocate. We could not be where we are today, on this exciting design-build project, without your team of professionals. Everyone associated with this project highly respects and enjoys the relationship your team has built with us.”

Rob C. McKinney
Chair
Wine Science Center Development Authority
Richland, WA
Temple University Library, Philadelphia, PA
Temple University is building a new $180-million, four-story, 350,000-square-foot research library building on the university’s Philadelphia campus. Hill is construction manager for the project.

Holland Tunnel, New York, NY
Hill provided inspection and assessment of damages to the Port Authority of New York and New Jersey on the Holland Tunnel as a result of a nine-foot storm water surge that occurred during Superstorm Sandy.

“Hill’s on-site representatives should be commended for their dedication and outstanding service. The qualified professionals of Hill’s senior management were available at all times to address certain problems that arose, which allowed our job to progress seamlessly without delay.”

Michael Burrows
Deputy Director of Development/Properties
Inland Valley Development Agency
San Bernardino, CA

“I was extremely pleased with the Hill staff, their professionalism, expertise and workmanship. It is rare to hit all cost, schedule and performance goals right in the bull’s-eye but thanks to Hill we did.”

Gary E. Lund
Infrastructure Program Manager
U.S. National Reconnaissance Office
Cape Canaveral, FL
Al Samawah Stadium, Al Samawah, Iraq

Hill is providing design review and construction management services for the new Olympic-sized, 20,000-seat stadium, hotel and landscaping, and will be designed to comply with FIFA standards. This is the third sports stadium in Iraq for which Hill has managed construction.

“The Hill team was an excellent owner advocate and did a fantastic job. Our project budget was met and the project was completed on schedule. Hill did an outstanding job anticipating potential problems and resolving them before they could impact the budget or schedule. They were meticulous during inspections to ensure the contractor built what was required and to the quality standard demanded. This project was a great success.”

Richard Prevallet
Vice President of Facilities and Construction
Tucson Medical Center
Tucson, AZ
National Museum of Qatar, Doha, Qatar
The new National Museum of Qatar, designed by eminent architect Jean Nouvel, will be a Qatari national treasure when completed in 2015. Hill is providing construction management services on the project.

Salt Lake City International Airport, Salt Lake City, UT
Salt Lake City International Airport serves 20 million passengers annually and ranks as the 26th busiest airport in the United States. Hill is providing program management support services on the airport’s ten-year, $1.8-billion Terminal Redevelopment Program.

Embassy of the Kingdom of Saudi Arabia, Cairo, Egypt
Hill is providing facilities management services for the Embassy, Consulate, Trade Office and Ambassador’s Residence buildings for the Royal Saudi Embassy in Cairo.

“This piece of inspired infrastructure changes the quality of life for everyone who experiences it. It took the collaboration and hard work of a truly talented team of professionals, including Hill International. Together, we were able to design and build the bridge better and more efficiently than ever done before.”
Habib F. Balian
Chief Executive Officer
Metro Gold Line Foothill Extension Construction Authority
Monrovia, CA

“We got the building we had worked so hard to get. A big part of our satisfaction happened because Hill went to bat for us. If I am ever involved in another facilities project, I would be very happy to have Hill International as our construction manager.”
Mike Staggs
Superintendent
New Boston Local Schools
New Boston, OH
**Iraq State Housing Commission**, Baghdad, Iraq

Hill is providing project management oversight (PMO) consulting services to the State Housing Commission (SHC) of the Iraq Ministry of Construction and Housing in connection with various housing developments throughout Iraq.

---

**Petrobras Rio de Janeiro State Petroleum Complex**, Rio de Janeiro, Brazil

Hill is providing specialized technical services in connection with various construction projects at the Petrobras Rio de Janeiro State Petroleum Complex.

---

**Secon Nile Towers**, Cairo, Egypt

The $172-million Secon Nile Towers will feature two 23-story buildings and have a total built-up area of approximately 110,000 square meters (1.2 million square feet). Hill is providing project management services during construction of this development.

---

“Your work has been EXCELLENT! Your ability to keep track of changes and determine contractual entitlement is no small achievement on your part. We have come to rely on your services as the sole keeper of the change process. Great job!”

Charles A. Hearn III, P.E.
Project Manager
U.S. General Services Administration
Philadelphia, PA

“We are pleased to express our sincere thanks and gratitude to Hill International in appreciation of your efforts and excellent performance in the management of this important project.”

Richard W. Riley
Chief Executive Officer
Abu Dhabi National Hotels
Abu Dhabi, UAE
The Lusail Towers development features a 35-story tower that will include a five-star hotel, restaurants, villas and apartments and a 27-story tower that will include offices, retail and other commercial uses. Hill is providing project management services during construction of the two towers.

“Hill International provided PennDOT with invaluable assistance with construction management duties. I wanted to go on record to state that Hill’s staff performed admirably and PennDOT was more than satisfied with their performance.”

Brian A. Early, P.E.
Senior Civil Engineer Manager
Pennsylvania Department of Transportation
King of Prussia, PA

The Lusail Towers development features a 35-story tower that will include a five-star hotel, restaurants, villas and apartments and a 27-story tower that will include offices, retail and other commercial uses. Hill is providing project management services during construction of the two towers.

“The Hill team has...successfully demonstrated its leadership, passion, commitment and technical competency as our project manager. We are looking forward to the continuance of our strong and collaborative relationship with Hill International.”

Kevin Twohig, C.F.E.
Chief Executive Officer
Spokane Public Facilities District
Spokane, WA
The $50-million Gereshk Electricity Services Improvement Project, funded by the Asian Development Bank, involves the rehabilitation and upgrading of the Gereshk Hydropower Plant to 4.8 megawatt capacity as well as construction and replacement of 30 kilometers of the Gereshk transmission and distribution network. Hill is providing project implementation and supervision services.

Grand Hyatt Rio, Rio de Janeiro, Brazil
Hill is providing construction management services in connection with the new Grand Hyatt Rio hotel, located at Barra da Tijuca Beach, one of the most exclusive residential areas of Rio de Janeiro. The hotel will have 436 rooms, including 43 suites, and will be the first Hyatt Hotel in Rio de Janeiro and the second Hyatt Hotel in Brazil.

Mitikah Development, Mexico City, Mexico
The Mitikah development is one of the largest mixed-use real estate developments in Latin America. Hill is providing project management oversight (PMO) services to Prudential Real Estate Investors during phase two of the project. This includes the construction of a 60-story mixed-use tower designed by Cesar Pelli that will be one of the tallest skyscrapers in Latin America, a 35-story tower designed by Richard Meier, a 93,000-square-meter (1.0-million-square-foot) retail mall designed by RTKL and a 465,000-square-meter (5.0-million-square-foot) residential complex.

Grand Hyatt Rio, Rio de Janeiro, Brazil
Hill is providing construction management services in connection with the new Grand Hyatt Rio hotel, located at Barra da Tijuca Beach, one of the most exclusive residential areas of Rio de Janeiro. The hotel will have 436 rooms, including 43 suites, and will be the first Hyatt Hotel in Rio de Janeiro and the second Hyatt Hotel in Brazil.

Mitikah Development, Mexico City, Mexico
The Mitikah development is one of the largest mixed-use real estate developments in Latin America. Hill is providing project management oversight (PMO) services to Prudential Real Estate Investors during phase two of the project. This includes the construction of a 60-story mixed-use tower designed by Cesar Pelli that will be one of the tallest skyscrapers in Latin America, a 35-story tower designed by Richard Meier, a 93,000-square-meter (1.0-million-square-foot) retail mall designed by RTKL and a 465,000-square-meter (5.0-million-square-foot) residential complex.

“Services provided were always complete and timely. Hill provided very good customer service and gained the confidence of all stakeholders with their knowledge, skills and abilities.”

Steven Eckelberg
Contracting Officer
U.S. General Services Administration
Denver, CO
Trump Towers Rio, Rio de Janeiro, Brazil
The Trump Towers Rio development will include five AAA 150-meter-high skyscrapers, each with 38 floors, and will have a total built-up area including commercial and underground space of about 450,000 square meters (4.8 million square feet). Hill is providing construction monitoring and procurement advisory services to the project's developer.

Frost Museum of Science, Miami, FL
The 250,000-square-foot, $275-million Patricia and Phillip Frost Museum of Science will be a cornerstone of Miami's 28-acre Museum Park. Hill is owner's representative during construction of this landmark structure.

Julian Adame Residential Development, Mexico City, Mexico
The $100-million Julian Adame development will feature five residential towers, underground parking, common areas and related facilities. Hill is providing project and construction management services during the design and construction phases of the project.

"Hill was responsible for the day-to-day overall program management...of the Iraq Reconstruction Program. The program involved more than 26,000 projects totaling more than $30 billion in construction value. Hill...helped the country rebuild during a turbulent and trying time, and laid the foundations for an improved Iraqi infrastructure."

J. Craig Johnson, P.E.
Vice President
Stanley Consultants Inc.
Minneapolis, MN
East London Convention Centre, East London, South Africa

The East London International Convention Centre is a world class purpose built convention and event centre. The centre is designed to host events, meetings and exhibitions, thereby providing for an exceptional client experience. Hill is currently providing dispute resolution and representation services to the project’s contractor.
Even the most carefully planned construction project can encounter problems, including claims and other disputes. How those claims are handled, however, can be the difference between success and failure. Since our founding in 1976, Hill International has been a world leader in providing construction claims services to our clients (owners, contractors, subcontractors, architects, engineers, law firms, insurance and surety companies, commercial and investment banks and others) on some of the largest and most complex projects and programs in the world.

Our approach to claims resolution is broad-based and relies on the participation of Hill’s multi-disciplined staff of engineers, architects, project and construction managers, cost and damages experts, scheduling and delay experts, legal specialists, contract administrators, accountants and other claims specialists. Such a range of expertise is essential in analyzing the complex liability, causation and damage components of a claim. Hill’s claims experts conduct detailed analyses of the claims, breaking them down event-by-event and issue-by-issue, to help facilitate evaluation and resolution.

Hill’s array of services includes claims analysis, litigation support, cost and damages assessment, delay and disruption analysis, expert witness testimony, lender advisory services, risk management, forensic accounting, fraud investigation, adjudication and the Project Neutral®.

Over the past four decades, Hill has participated in over 50,000 disputes valued in excess of $100 billion. Today, we are the largest construction claims practice with the most experience and the greatest depth of resources and capabilities in the world. The following are just a few of the major claims and consulting assignments that Hill was selected for in 2013.
Kumba Sishen Mine Project, Kathu, South Africa
Sishen Mine is Kumba’s flagship operation and one of the largest open-pit mines in the world. Hill is providing construction consulting services to Kumba.

Mega Port Itaguai, Rio de Janeiro, Brazil
Mega Port “Porto Sudeste” is a multi-billion dollar greenfield port development commissioned by MMX. Hill is providing construction consulting assistance to a client who is purchasing a large stake at the Port.

Clark County Water District, Las Vegas, NV
The Clark County Water Reclamation District has embarked on a five-year, $690-million capital improvement plan. Hill’s role in the program involves full life-cycle implementation services and enterprise project management.

“Your insights into the case were invaluable in helping us understand the project, our client’s roles and responsibilities, and why project costs increased. With your assistance, we were able to undermine and attack our opponent’s claims and its expert’s opinion to the point that the jury ultimately ruled in our favor. Expect to hear from us when we get our next big construction/engineering case.”

Albert E. Peacock III, Esq.
Partner
Keesal, Young & Logan, P.C.
Long Beach, CA
ABB Power Substation, Amarah, Iraq
Hill is providing consulting services during construction of the ABB Power Substation in Southeastern Iraq.

Macy's at Summerlin Centre, Las Vegas, NV
Hill is providing CPM scheduling services for this outdoor shopping center which is part of a mixed-use development. The mall is scheduled to open by December 2014 and will feature 1.8 million square feet of retail space.

Kempinski Jumeirah, Dubai, UAE
Kempinski Jumeirah is a five-star hotel located on the world renowned Palm Jumeirah in the Arabian Gulf. Hill provided consulting and advisory services during construction of the hotel.

“The knowledge that Hill's subsidiary Knowles is representing our clients assures that matters will be dealt with professionally, fairly and, importantly, without ill-judged legal sabre-rattling that so often exacerbates disputes, rather than resolves them.”

Paul Dinsdale
Director
PDA Group Ltd.
Buxton, UK
Manjung 4 Power Plant, Manjung, Perak, Malaysia
Once completed, Malaysia will to be the first country in Southeast Asia to not only boast an ultra-supercritical power station, but one in which both the boiler and the steam turbine were manufactured in Asia. Hill is providing contract oversight and claims consultancy services for this project.

Antarctic Research Station-Halley VI-Red Module, Antarctica
This Antarctic Research Station, located on the Brunt Ice Shelf, is a British research facility dedicated to the study of the Earth's atmosphere. Hill provided consulting services during station improvements.

Western High Speed Highway, St. Petersburg, Russia
The Western high speed highway is a toll motorway in Saint Petersburg, Russia. Hill performed commercial risk analysis and consulting services during construction.

“I just wanted to say thanks for all the great effort that went into your final report.”

2013: The Year in Review

January

1. Hill lies for second place on Building Design magazine's annual ranking of architects' favorite project managers to work with, as determined by a survey of the world's largest architecture practices.

March

18. The Philadelphia Inquirer ranks Hill as the 23rd best place to work among mid-sized employers (between 150 and 500 employees) in the region on its “Top Workplaces 2013” list.

27. Hill wins a regional Project Achievement Award from the Southern California Chapter of the Construction Management Association of America (CMAA) for the Gold Line Bridge in Arcadia, California, which won the award for “Transportation Project Between $11-$50 Million.”

May

1. Basil P. Alexander, Managing Consultant in Hill’s Washington, DC office, is named by Building Design & Construction magazine to its eighth annual “40 Under 40” list of outstanding young professionals in the architecture, engineering and construction industry.

14. Two Hill projects receive Quality Awards for Projects from Middle East Economic Digest (MEED) magazine. The two projects, both located in Abu Dhabi, were Etihad Towers, which won “UAE Building Project of the Year” and the Gate District Towers 3, 4, 5 and 7, which won “UAE Leisure & Tourism Project of the Year.”

15. Timothy R. Collins of Hill’s Miami, Florida office is selected as 2012 Project Manager of the Year, and Timothy P. McColdrick of Hill’s Daresbury, England office is selected as 2012 Consultant of the Year.

31. Hill acquires South Africa's Binnington Copeland & Associates, a firm that provides commercial and contractual consulting and training services to the construction industry.

June

6. Two Hill projects are recognized by Engineering News-Record (ENR) as among the magazine's Global Best Projects. The award-winning projects were the Morine-Merdare Motorway in Kosovo, which received the Best Project Award in the “Roads/Highways” category, and Etihad Towers in Abu Dhabi, which received an Award of Merit in the “Retail/Mixed-Use Developments” category.

7. The No. 7 Subway Line Extension project in New York City receives the 2013 Construction Project of the Year Award from the New York State Society of Professional Engineers for outstanding professional engineering efforts in developing creative solutions and innovative technologies in construction of an infrastructure project.

20. Hill receives a regional Project Achievement Award from the CMAA's Mid-Atlantic Chapter for Bloom Energy's Brookside Generating Facility in Brookside, Delaware.

21. Hill wins a regional Project Achievement Award from the Metro New York/New Jersey Chapter of the CMAA for the rehabilitation of New York City Hall.

October

5. Hill receives the 2013 Outstanding Highway Engineering Award from the Pittsburgh Section of the American Society of Highway Engineers for the Montour Run Bridge No. 6 replacement project in Allegheny County, Pennsylvania.

12. Thomas J. Driscoll, Senior Vice President in Hill's Denver, Colorado office, is recognized with the prestigious Construction Management Award by the American Society of Civil Engineers.

24. Hill wins two Owners' Project Excellence Awards from the Western Council of Construction Consumers. The two projects recognized were the Gold Line Bridge in Arcadia, California, which won a Distinguished Award for Infrastructure, and the I-5/Gene Autry Way Interchange in Anaheim, California, which won a Significant Award for Infrastructure.

25. The Zweig Letter ranks Hill as the 77th fastest-growing company among architecture, engineering, planning and environmental consulting firms in the U.S. and Canada, the 11th time in the past 12 years that Hill has been included on Zweig's "Hot Firm" list.

November

6. Hill is recognized for our role as construction manager for the modernization of New York City Hall, which receives an Award of Merit from ENR as one of the magazine's 2013 Best Projects in the category of “Renovation/Restoration.”

25. Hill receives two Construction and Sustainability Awards of Excellence from Big Project magazine. The first award was for "Outstanding Achievement in Project Management." The second award was for on Etihad Towers in Abu Dhabi, which was recognized as “Iconic Structure of the Year.”

December

5. The Gold Line Bridge in Arcadia, California is recognized with a Best Projects Award by ENR California in the category of “Highways/Bridges (Southern California).”

23. Hill acquires Boston-based Collaborative Partners, a firm that provides project management services for healthcare, life sciences, educational, commercial and residential construction projects throughout New England.

31. Hill ends the year with record total backlog of $1.027 billion, the first time in the company's history that Hill has exceeded one billion dollars in backlog.
