Corporate Summary

For nearly four decades, public- and private-sector clients worldwide have selected Hill International (NYSE:HIL) as construction consultants on their most complex projects. Each of our clients has unique needs and goals, yet they choose Hill because they need experts who can prevent problems, minimize risks and eliminate surprises – they need a firm they can trust who will deliver results. Meeting our clients’ diverse needs in managing construction risk and exceeding their highest expectations is our goal at Hill. We accomplish this objective by providing a broad range of project management, construction claims and consulting services that support our clients during every phase of a project, from concept through completion. With 4,700 professionals in 100 offices worldwide, Hill has the experience and the expertise to help our clients deliver their projects on time, within budget and with the highest quality possible.

Cover photo: World Trade Center Transportation Hub, New York, NY. Located on the 16-acre World Trade Center site in Lower Manhattan, the Transportation Hub has been called one of the world’s most complex, ambitious and symbolic projects. The glass and steel Transportation Hub was designed by renowned Spanish architect Santiago Calatrava to be a permanent and poignant replacement for a temporary rail station built to restore transit service to Lower Manhattan following 9/11. Hill has been providing program management services on this project since 2002.

Inset photo: Gateway Towers, Abu Dhabi, UAE. Hill managed construction of the unique $1.6 billion mixed-use Gateway Towers in Abu Dhabi for Sorouh Real Estate. The Complex was later capped with a two-story penthouse structure connecting the three luxury high-rise towers at the 64th and 65th floors (approximately 240 meters in height) utilizing a process that included the highest and heaviest lift in history.
To Our Fellow Stockholders:

We are pleased to announce that 2014 was a very positive year for Hill International. Our company continued to aggressively grow its top line, with total revenue and consulting fees climbing to all-time highs. We were successful in closing both an equity offering and debt refinancing which strengthened our balance sheet and significantly lowered our ongoing interest expense. And our business development efforts resulted in record net bookings during the year which drove our total backlog at year-end to a record $1.08 billion.

And so far in 2015, we continue to be successful in attracting new clients and winning new projects throughout the world, where our global presence, depth of experience and outstanding professionals have created one of the very best professional services firms in the global construction industry.

Hill International’s mission is to be the very best professional services firm in the world helping our clients minimize the risks inherent in the construction process.
2014 Financial Results

Hill's total revenue was up 11% to a record $640.3 million last year, and our consulting fee revenue increased 12% over the prior year to a record $575.8 million. This was our second year in a row of double-digit growth following the end of the Great Recession, during which we averaged just 6% growth in consulting fees (although this was much better than many of our competitors). We are forecasting that 2015 will be our third consecutive year of double-digit growth, with consulting fees expected to increase between 13% and 17% this year to approximately $650 million to $675 million.

Our recent growth was recognized once again by The Zweig Letter, which ranked Hill on its “Hot Firms 2014” list as the 44th fastest-growing firm in the construction industry in the U.S. and Canada over the prior three years. We have now made that distinguished list a remarkable 12 times in the past 13 years.

This growth came at a cost, which was that our overhead expenses increased by 19%, significantly higher than the growth in our consulting fees last year. Our SG&A margin as a result rose to 37.8% last year from 35.8% in 2013. Although this is much improved from 41.4% in 2012 and 43.9% in 2011, it is still a step in the wrong direction and we have made it a priority in 2015 to minimize our overhead costs as much as possible.

We had another strong year for EBITDA, but not quite as high as 2013’s record performance. Hill’s EBITDA was $37.8 million last year, down 8% from the prior year. Similarly, our operating profit was down 10% last year to $29.3 million. As a result of one-time expenses of $10.8 million incurred in connection with our debt refinancing and significantly higher foreign income tax expenses, Hill showed a net loss of ($10.9 million) for the year, or ($0.25) per diluted share. Suffice it to say we do not expect this net loss to be repeated in 2015.

Looking at our two operating segments separately, Hill’s Project Management Group delivered strong results in 2014. Total revenue was up 7% to a record $486.4 million and consulting fees were up 9% to a record $427.5 million. Operating profit for the Projects Group was $48.5 million last year, a slight drop of only 0.3% from its 2013 record. The group’s operating margin was 11.3% for the year, down from 12.4% in 2013.

Hill’s Construction Claims Group had much stronger growth in 2014 than the Projects Group, but significantly more challenges with regard to profitability. Both total revenue and consulting fees grew by 24%, to records of $153.8 million and $148.3 million, respectively. Operating profit for the Claims Group, however, declined by 10% to $11.0 million. The group’s operating margin last year was 7.4%, down from 10.2% the year before and the lowest it has been since before Hill became a public company in 2006.

Top-line growth should result in improving, not declining, bottom-line performance. That both of our operating segments saw record revenues but shrinking operating margins means their management teams know exactly what their priority is going forward: not just growing their businesses but significantly improving their profitability as well.

Equity Offering and Debt Refinancing

Our goal to improve overall profitability going forward was significantly aided by our successfully closing last year both a $40 million equity follow-on offering led by KeyBanc Capital Markets and a $165 million senior debt refinancing with a group of new lenders led by Société Générale. This new equity and debt capital allowed us to pay off and terminate our prior Bank of America revolver and our second lien term loan from Tennenbaum Capital Partners, both of which were significantly more expensive than our new facilities. This was a major accomplishment for our company in 2014. While we incurred one-time expenses of $10.8 million in connection with the debt refinancing, we significantly lowered our going forward interest expense and greatly increased our ability to consistently deliver net profits to the bottom line. We also were able to significantly improve our borrowing capacity so that we have adequate capital for our anticipated growth in the years ahead.

Acquisition of Cadogans

We operate in two sectors that are highly fragmented with many smaller, regional competitors. We believe that through a strategy of acquiring and integrating the best of these firms, we can accelerate our growth and continue to improve our competitive position. Last year, Hill acquired just such a firm.

In October, we acquired Angus Octan Scotland Ltd., a firm trading as Cadogans that provides multi-disciplinary engineering and other technical consulting services. The firm, which has about 30 professionals, has offices in Glasgow and Dundee in Scotland. Cadogans has expertise in mechanical, marine, electrical, energy, chemical, architectural, building services, civil and structural engineering,
materials and corrosion. Their services are in demand worldwide on projects large and small, from multinational nuclear power litigation to international oil and gas projects. Cadogans was an important acquisition that has greatly expanded the resources and capabilities of our Construction Claims Group in the United Kingdom.

New Business Development

In 2014, we had the most successful year in the history of our company with regard to our business development efforts, with net bookings of approximately $628 million during the year. Hill was awarded significant new work on some of the largest and most complex construction projects and programs in the world last year.

These included the extension of the commuter rail system for Denver’s Regional Transportation District, renovation of Terminal Building No. 2 at Cairo International Airport, construction of Miami’s Frost Museum of Science, redevelopment of the Astir Palace Resort in Athens, the construction of Sydney’s North West Rail Link, and development of the Island City Center residential towers in Mumbai.

Hill received a new contract last year from the U.S. Federal Transit Administration to continue providing project management oversight services on federally-funded transit projects nationwide, a service Hill pioneered and has been continuously providing to the FTA for nearly 30 years.

We were also retained to help manage Superstorm Sandy recovery efforts for multiple state and local agencies throughout New York and New Jersey. These and some of the other exciting new projects we won last year are profiled on subsequent pages of this Annual Report.

As a result of this success, we remain very optimistic about our revenue growth and financial performance in the years ahead. We will continue, as always, to make new business development one of our company’s highest priorities.

2015 and Beyond

Since the beginning of this century, Hill International has been one of the most successful firms in the global construction industry. From 2000 through 2014, we grew our annual consulting fees from less than $30 million to more than $575 million—more than nineteen-fold growth. We grew our employee base from 300 professionals mostly in the U.S. to 4,700 professionals in 100 offices in 40 countries around the globe. We have won nearly 100 awards for excellence in managing our clients’ construction projects (12 of them in just the past year alone). And we took Hill from a small, private, family-owned firm to a global public company listed on the New York Stock Exchange.

But while winning awards for project excellence or fast growth are impressive, we have not been as successful in delivering consistent profits for the benefit of our stockholders. This in turn has hindered the performance of our stock. In 2014, our common stock dropped by (2.8%), trailing behind the broader markets (the Russell 2000 Index was up 4.9% and the S&P SmallCap 600 Index was up 5.8% last year). Although most investors on Wall Street have yet to catch on to what a great company we have built, we remain confident that Hill is on the right track. If we continue to perform successfully for our clients and continue to manage our business well, we know that our top and bottom lines will continue to improve substantially and our common stock will be priced accordingly.

We and the rest of our management team remain focused on the right issues: maximizing our revenue growth, minimizing our overhead costs, and continuing to exceed our clients’ expectations in every way possible.

We thank you for your investment in our company and your trust and confidence in our board of directors, our management team and our outstanding professionals around the world. We will continue to work hard in 2015 and beyond to reward that investment and to ensure that Hill International excels in its mission: to be the very best professional services firm in the world helping our clients minimize the risks inherent in the construction process.

David L. Richter
President and Chief Executive Officer

Raouf S. Ghali
Chief Operating Officer
Since becoming a public company in 2006, Hill has delivered strong revenue and backlog growth. In 2014, we achieved record revenues and it was the most successful sales year in Hill’s history. A key accomplishment during the year was successfully raising $40 million in equity and refinancing $165 million in senior debt, strengthening our balance sheet and positioning Hill for even greater growth in the years ahead. Following are some highlights of Hill’s financial performance in 2014 and over the past five years.

Patricia and Philip Frost Museum of Science, Miami, Florida
The 250,000-square-foot, $275 million Frost Museum of Science will be a cornerstone of Miami’s 28-acre Museum Park. Hill is acting as owner’s representative during construction of this landmark structure.
Construction is one of the world’s most difficult and challenging endeavors, and big projects carry big risks. Even one mistake in any of the thousands of different tasks on a project can mean big problems and result in serious schedule delays and cost overruns. With the financial stakes so high, it is critical that every step of the project be managed carefully. Hill International is one of the premier firms in the world helping our clients manage their projects and programs more effectively, so that they are finished on time, within budget and with as few claims as possible.

Whether the project is a high-speed rail line or a high-rise office building, we provide our clients with a full-spectrum of services, including program management, project management, construction management, project management oversight, troubled project turnaround, staff augmentation, project labor agreement consulting, commissioning, labor compliance management, and estimating and cost management services.

Having participated in over 10,000 project assignments with a total construction value of more than $500 billion, Hill has managed all phases of the construction process, from concept through completion. Engineering News-Record magazine recently ranked Hill as the ninth largest construction management firm and the eleventh largest program management firm in the United States.

We are currently managing some of the largest and most complex projects and programs in the world, including construction of the Jabal Omar mixed-use development in Saudi Arabia, construction of the Doha Metro Green Line in Qatar, and the redevelopment of Route 6 in Kosovo. Our portfolio of successful projects becomes larger and more impressive each year, as you can see from the projects on the following pages that Hill was selected to manage in 2014.
“Thanks to the Hill team for what they have done to deliver the Red Lion project and close things out earlier. You have represented us very well and have managed a number of complex issues along the way. I greatly appreciate your commitment to results and excellence!”

Bill Kurtz
Chief Financial Officer and Chief Commercial Officer
Bloom Energy
We commend Hill’s dedication and outstanding service, especially given the complex and challenging demands of managing this project. The qualified professionals of Hill’s senior management were available at all times to address problems that arose, which allowed our job to progress seamlessly with minimal delay. I would recommend Hill International for all program, project or construction management needs.”

Patrice Brunet
General Manager
Swan Operations Ltd.
San Francisco International Airport, San Francisco, CA

Hill is providing project management services for the airport’s temporary boarding area B and the security screening checkpoint area of Terminal 1. Hill is also providing as-needed project management services for other facets of the airport’s capital program as part of a three-year contract.

“In my 25 years managing design and construction projects, this was the most extraordinary experience of teamwork coupled with an incessant drive for quality and on-time completion of our project. I congratulate your team for our shared success.”

Charles A Hearn, III P.E.
Project Manager
U.S. General Services Administration
The Hill team completed their services professionally and was instrumental in helping us deliver the New Data Center Facility as intended. They employed a collaborative design-build support approach to improve design quality while still meeting the project’s demanding schedule.

Mark Costanzo P.E.
Project Manager
San Francisco International Airport
“I am pleased to extend my sincere appreciation for Hill’s continued support. The Grand Egyptian Museum is one of the most demanding ongoing museum projects in the world. The team has impressively demonstrated the capability to understand our needs and face new challenges.”

Dr. Tarek Sayed Tawfik
General Director
Grand Egyptian Museum
“We are quite confident that Hill will continue to provide all efforts needed to achieve our interests and continue to complete all matters related the project, not only meeting, but exceeding the required levels of efficiency and quality.”

Nabil R. Akileh  
Project Director  
International Capital Trading
Project Management Group

Hill provided valuable resources that helped us achieve a successful project outcome in less time than originally projected. It was done with professional and technical support that is a distinct advantage of working with Hill International.

Stephen H. Montgomery  
President and CEO  
Williamsburg Landing

“The Hill team was always accessible and served as a truly helpful bridge between us and all of the construction trades. They were able to interpret our questions to get to the heart of our concerns and always kept us informed.”

Pamela E. Green  
Executive Director  
Weeksville Heritage Center

FBI Office Building, San Juan, Puerto Rico
The new $85 million FBI office building, located within the Federal campus in the Hato Rey section of San Juan, will include an office building, technical services annex and parking garage. Hill is providing project management services on this project.

Boulevard Mall, Doha, Qatar
Hill is providing project management services on the 2-million-square-foot Boulevard Mall, which will feature a hypermarket, cinema and family entertainment center.

Pristina-Hani i Elezit Highway (Route 6), Kosovo
The 60-kilometer (37-mile) Pristina-Hani i Elezit Highway (Route 6) has strategic importance for the Kosovo economy, representing one of two important connections with trans-European corridors. Hill is providing construction supervision services during redevelopment of this major infrastructure project.
Hill has been a great advocate for us and their team has gone beyond the call of duty in their relentless and enthusiastic efforts to support our projects. Hill takes great pride in their work and I have no hesitation in recommending them.”

Gary E. George
CEO
Wildhorse Resort & Casino
“Without hesitation, I highly recommend Hill International to any owner that needs an experienced and successful project and construction management firm. Hill demonstrated how it uses superb leadership, passion, commitment, knowledge and technical competency to be the program owner’s advocate.”

Rich Purser
General Manager
Clearwater Casino Resort
NYCT’s Superstorm Sandy Recovery Efforts, New York, NY
Hill is providing construction management and inspection services for the New York City Transit Authority’s Superstorm Sandy recovery efforts and other miscellaneous construction projects.

Mall of Qatar, Doha, Qatar
Spread over 1.8 million square feet, the Mall of Qatar will have a 300-key hotel, major hypermarket, five department stores, 20 restaurants and an indoor streetscape with flagship stores from around the world. Hill is providing project management services.

University of Massachusetts, Boston, MA
Hill is providing project management services for the UMass academic facility renovations project which includes selective renovations at McCormack Hall, Wheatley Hall and other buildings throughout the university’s Boston campus.

Lugoj-Deva Section of the A1 Motorway, Romania
Hill was selected by the Romanian National Company of Motorways and National Roads to provide supervision services during design and construction of the 100-kilometer (62-mile) Lugoj-Deva Section of the A1 Motorway in Romania.

“The Hill team dealt with inclement weather, material delays, subcontractor performance, owner changes and other setbacks in a pleasant, creative and effective manner. The budget was maintained without compromising quality and it is a pleasure to recommend the Hill team.”

Edward Adelman
Executive Director
Massachusetts State College Building Authority

“With Hill’s support, the Construction Authority is on time and on budget for delivery of the current segment of the line to Azusa and is now underway planning the next 12.3-mile segment. Our success is linked with Hill International.”

Habib F. Balian
Chief Executive Officer
Metro Gold Line Foothill Extension Construction Authority
Andasol 3, Granada, Spain
Hill provided construction consulting support to Marquesado Solar SL on Europe’s first Parabolic trough solar power station.
Even the most carefully planned construction project can encounter problems, including claims and other disputes. How those claims are handled, however, can be the difference between success and failure. Since our founding in 1976, Hill International has been a world leader in providing construction claims services to our clients (owners, contractors, subcontractors, architects, engineers, law firms, insurance and surety companies, commercial and investment banks and others) on some of the largest and most complex projects and programs in the world.

Our approach to claims resolution is broad-based and relies on the participation of Hill’s multi-disciplined staff of engineers, architects, project and construction managers, cost and damages experts, scheduling and delay experts, legal specialists, contract administrators, accountants and other claims specialists. Such a range of expertise is essential in analyzing the complex liability, causation and damage components of a claim. Hill’s claims experts conduct detailed analyses of the claims, breaking them down event-by-event and issue-by-issue, to help facilitate evaluation and resolution.

Hill’s array of services includes claims analysis, litigation support, cost and damages assessment, delay and disruption analysis, expert witness testimony, lender advisory services, risk management, forensic accounting, fraud investigation, adjudication and the Project Neutral®.

Over the past four decades, Hill has participated in over 50,000 disputes valued in excess of $100 billion. Today, we are the largest construction claims practice with the most experience and the greatest depth of resources and capabilities in the world. The following are just a few of the major claims and consulting assignments we won during 2014.
“Our client was very grateful for Hill’s involvement and I would highly recommend Hill as expert witness or in an advisory role for disputes.”

Pak Waltan
Associate Director
United Legal Alliance LLC
Kuala Lumpur International Airport, klia2 Terminal, Selangor, Malaysia
Kuala Lumpur International Airport's klia2 is a mega terminal for low cost carriers at the Kuala Lumpur International Airport. Hill is providing contract, commercial and claims support services for this project.

Essential Energy, New South Wales, Australia
Essential Energy is a state-owned organization responsible for building, operating and maintaining Australia’s largest electricity network. As part of a strategic review, Hill conceived and led the implementation of a major reform program to significantly improve Essential’s portfolio and program/project management capability.

North West Rail Link, Australia
Hill is providing delivery coordination and assurance services on the $6.5 billion North West Rail Link, Australia’s largest public transport infrastructure project. The project, being delivered by the Government of New South Wales, will deliver eight new railway stations and 4,000 commuter car parking spaces to Sydney’s growing North West region. It includes twin 15km railway tunnels—Australia’s longest—and will open to commuters in 2019.

“I want to thank Hill for all of their assistance with our excellent settlement result. They did an outstanding job mastering a large volume of complex material and I have already recommended them to my colleagues. We hope to work with Hill again in the future.”

Kerry B. Fisher, Esq.
Assistant Attorney General
State of Maryland Office of the Attorney General
I have known and worked with the Hill team for years and have been quite pleased with both their results and the relationships I have built with their team.

Dentons

Construction Claims Group

Kingdom Tower, Jeddah, Saudi Arabia
More than one kilometer (3,280ft) tall, Kingdom Tower will be a mixed-use development that is destined to be the world’s tallest building upon completion. Hill is providing contract, commercial management and claims services to the main contractor on the project.

Eastman Shanghai Laboratory, Shanghai, China
Hill provided an independent cost audit for the China Headquarters of Eastman (Shanghai) Chemical Commercial Company located in the Pudong New Development Area.

Los Angeles Exposition Light Rail Program, Los Angeles, CA
Hill provided claims consulting and dispute resolution services during Phase 1 of the Los Angeles Exposition Light Rail program in Southern California.
I am deeply impressed with Hill as an expert, both in terms of written work and ability to provide oral evidence. Programming reports are succinct, clear and concise and deal perfectly with the critical issues in the matter.
